

Wild Alaska

SNOW CRAB

FLAVORFUL, ELEGANT, WIDELY APPEALING

Alaska Snow Crab is truly one-of-a-kind shellfish that's simple yet distinctive, with delicately sweet, snowy white flesh that belies its tremendous value and widespread popularity. The trademark big clusters guarantee a memorable presentation, dramatic alone as an appetizer or entrée, or as the centerpiece of a salad, soup, surf-and-turf, seafood platter or buffet.

A SEASONAL DELICACY, AVAILABLE YEAR-ROUND

All Alaska Seafood is wild and pure, responsibly managed for continuing abundance. Crab harvesting seasons are timed to ensure optimum quality and are strictly limited to ensure sustainability. Alaska Snow Crab is harvested during the fall and winter season, and is available frozen throughout the year, ensuring a steady supply of superior quality product.

WIDE CHOICE OF CONVENIENT FORMS

Alaska Snow Crab is available cleaned and precooked, in cocktail claws, clusters, whole legs, split legs or lightly scored 'Snap 'n Eat' legs—all easy to prepare and consistent in quality, with uniform meat in-fill and shell condition.

GREAT VALUE AND VERSATILITY

Alaska Snow Crab is recognized as one of today's best shellfish values, thanks to its delicious flavor, stunning appearance and ease of preparation. It also enjoys widespread consumer appeal, whether steamed, sautéed, or broiled.

SUSTAINABLY SOURCED

Alaska has pioneered the standard for sustainable, eco-friendly fisheries management. Unlike many of the world's other fish populations, Alaska's are managed for protection against overfishing and sources of habitat damage. By proactively ensuring a healthy, wild and sustainable harvest, Alaska is protecting its superior seafood for future generations.
